

# Milizid kraftgel

## Acidic basic sanitary cleaner

### Area of application

For basic cleaning in the sanitary area and in wet areas on all waterproof and acid-resistant surfaces. Removes heavy mineral staining, such as rust and urine scale, as well as oil / fat stains. Clings to vertical surfaces.

### Application

Use over the whole sanitary area undiluted or diluted up to 1:10 in water (1 part MILIZID KRAFTGEL to 10 parts water). Allow 10 minutes to take effect and then rinse thoroughly with clean, cold water. Repeat, if necessary, for solid residues. Clean larger areas with the DR.SCHNELL FOAM CANNON.

### Product characteristics

- The synergistic combination of acids also acts on rust and pyrolusite deposits
- Very effective sanitary cleaner, with no "corrosive" characteristics
- The product's viscosity provides good adhesion, even on vertical surfaces
- Ideal for use with the DR.SCHNELL FOAM CANNON
- Also very suitable for use on solid fixtures

Prerequisite: guaranteed proper application, especially thorough rinsing with clean water

### Note

Do not apply onto materials sensitive to acids, such as e.g. marble. Wet non-acid-resistant joints for all cleaning methods beforehand. After cleaning with MILIZID KRAFTGEL, always thoroughly rinse surfaces, floors, wall-tiles and joints with clean, cold water. Test the material suitability of MILIZID KRAFTGEL in an inconspicuous area prior to use

### Technical information

Carton of 20 x 500 ml bottles  
with angled nozzle  
Carton of 12 x 1 litre bottles  
10 litre canister

order No. 00389
