

Clarida Sani

Sanitary cleaner

Features

Acid-based sanitary cleaner. Removes deposits of lime scale, urine stone and soap scum.

Ingredients (according to 648/2004/EC)

Nonionic surfactants < 5%, inorganic acids, organic acids, maintenance substances, dyes, fragrances (limonene, hexyl cinnamal).

pH value (concentrate): approx. 1

pH value (ready-to-use solution): approx. 4

Application

Suitable for use on acid-resistant and water-resistant surfaces and objects in sanitary areas, such as ceramic wall and floor tiles, wash-basins, toilet bowls, urinals made of ceramic, porcelain or stainless steel. Acid-sensitive surfaces, such as damaged chromium coatings on fittings, brass, anodised aluminium, polyamid as well as acid-sensitive natural and artificial stone floors may be damaged by acid-containing products.

Directions

Please test a small inconspicuous spot before first application to establish whether the material is acid-resistant.

Surface cleaning / Wiping:

Apply Clarida Sani undiluted to a wet cloth or a non-abrasive sponge and clean the surface. Rinse off or wipe thoroughly with water.

Spray undiluted under rim of toilet bowl, distribute with toilet brush, allow to act for a short while, flush or

up to 20 ml in 4 litres of cold water.

Moisten the surface with the cleaning solution and clean with sponge, cloth or mop. Rinse off or wipe with clear water.

Kiehl accepts no liability or responsibility for damage caused as a result of incorrect use or application of the product.

**Sanitary
cleaning**

Coverage per square metre

Surface cleaning / wiping: 1–5 ml
