

# Thermodur-satina

## Metallised matt-finish emulsion polish

### Features

Metallised emulsion polish with a high solids content and excellent film-building properties. Thermodur-satina provides a high-quality non-slip coating which is particularly durable, dirt-resistant and wipe-proof. The matt finish will not become shiny even when polished. The coating is resistant to disinfectant cleaners.

### Ingredients

Polymer dispersions, polyethylene waxes, water-soluble solvents, resins, plasticizers.  
pH value (concentrate): approx. 8.5

### Application

Suitable for use on water-resistant, stripped floor coverings, such as PVC, rubber, linoleum, absorbent natural and artificial stone. Before using Thermodur-satina on P-U or P-E floor coverings, please make an adhesion test.

### Directions

#### Shake well before use!

After stripping the floor and a short drying time, apply product undiluted in a thin layer using a flat mop. Do not let the product dry on the mop and immediately close the container after use.

#### Coating stripped floor coverings:

Depending on the absorbency level of the floor, 2-3 applications at approx. 30-minute intervals may be necessary.

For routine cleaning, do not use maintenance products, since they can create a shiny effect.

**Floor finishing**

### Coverage per square metre

Coating: 25 ml per application

No consumer product according to 1999/44/EC Art. 1! For professional use only!

### Packaging

Carton of 2 x 5 litre containers

Art. No. j 20 07 05

Protect from frost!
