

Milizid

eco

Sanitary cleaner & limescale remover

Area of application

MILIZID ECO is suitable for all acid-resistant, washable surfaces, fixtures, tiled walls and floors.

Application

For the daily cleaning of normally soiled areas, apply 10 ml of MILIZID ECO to 4 litres of COLD and CLEAR water, and thereafter apply the solution in a two-phase wet wiping process. In case of stubborn soiling, increase the dose. If necessary, apply undiluted. Rinse with fresh water after a short application period. Pre-soak joints.

Cleaning of toilet bowls/urinals:

Apply MILIZID ECO undiluted underneath the rim, work using toilet brush and flush after a short application period (max. 5 minutes).

Please note: Before applying the cleaning agent, completely tip up the toilet seat. This sanitary cleaning concentrate can be applied very sparingly. The correct dosage saves costs and cares for the environment.

Product characteristics

- Awarded with the eco-label of the European Union ("EU Ecolabel")
- Excellent limescale and oil/grease dissolving power
- Pleasant natural fragrance
- Can be used with all cleaning procedures, also with soft foam cleaning
- Simple, ergonomic application with a practical spray bottle

Note

Wet joints and fittings thoroughly before cleaning. Always rinse floors, walls and fixtures thoroughly with clean water after cleaning. Do not use MILIZID ECO on calciferous stone (e.g. marble) or surfaces sensitive to acids, such as enamel that does not conform to the DIN standard. Test the material suitability of MILIZID ECO beforehand in an inconspicuous area. The product is intended for commercial use only. Keep out of the reach of children. Do not mix with other cleaning agents. Do not inhale spray mist.

Service

For spray mopping, use the original MILIZID hand and pressure sprayers, which we may provide you with an additional ECO label. For this purpose, please call our order hotline and order the necessary units of additional ECO labels.
